

A Minor Project Report On
“News Blogging Website”

For the Partial Fulfilment of the 5th Semester Practical of
Bachelor of Computer Application of Veer Narmad South
Gujarat University, Surat

Bachelor of Computer Application [B.C.A]
Semester – V

By
Foram Savaliya Exam No:- 2020017114

Guided By
[Sweta Mam]

DEVIBA INSTITUTE OF COMPUTER APPLICATION, SABARGAM

Year: 2024-2025

**AMBABA COMMERCE COLLEGE, MANIBA
INSTITUTE OF BUSINESS MANAGEMENT &
DEVIBA INSTITUTE OF COMPUTER APPLICATION,
SABARGAM (Self Finance)**

At. Sabargam, Po. Niyol, Tal. Choryasi, Surat-394 325.

Managed By Shree Dakshin Gujarat Shikshan Samaj, Kumbharia

Certificate

This is to certify that Dhruv Barvaliya Roll no 7 Exam Seat Number:

2870 have satisfactorily presented their Project work Entitled

News Blogging Website as a partial fulfilment of requirements for **5th Semester–**

B.C.A., during the academic Year 2024-2025.

Guide Name: Sweta Mam

Dr. Falguni M Thakkar

Principal

**Ambaba Commerce College, MIBM & Deviba
Institute of Computer Application, Sabargam**

Date :

Place : Sabargam, Surat

1. Introduction

1.1 Existing System

- Discuss the current systems available for blog or content management.
- Mention common limitations in terms of user experience, content management, or security.

1.2 Limitation of Existing System

- Lack of user roles or limited role management.
- Limited CRUD (Create, Read, Update, Delete) operations.
- Poor user interface and lack of responsive design.
- Limited or no SEO optimization.

1.3 Proposed System Introduction

- Overview of the new system, which aims to provide a robust content management system (CMS).
- The system will offer both an admin panel for managing content and a client-facing interface for content consumption.

1.4 Project Profile

- **Title:** News Blogging Website
- **Front-End Technologies:** HTML, CSS, Bootstrap, PHP
- **Back-End Technology:** MySQL
- **Modules:** Admin Panel, Client Interface

1.5 Scope of Proposed System

- The proposed system will allow administrators to manage content, categories, and users efficiently.
- Clients will have access to a well-structured blog with search capabilities and author categorization.

1.6 Objective of Proposed System

- To build a user-friendly CMS that supports CRUD operations for posts, categories, and users.
- To provide a responsive interface with secure login features.
- To integrate search functionalities for easy content discovery.

1.7 System Environment Description

- **Development Environment:** PHP, MySQL, Apache or Nginx server.
- **Deployment Environment:** Any server that supports PHP and MySQL.

2. Detail Description of Technology Used

2.1 HTML

- Description of HTML and its role in structuring the front-end of the web application.

2.2 JavaScript

- Explanation of JavaScript for client-side scripting to enhance user interaction.

2.3 Bootstrap and CSS

- Overview of Bootstrap for responsive design and CSS for custom styling.

3. System Design

3.1 Task Dependency Diagram

- Provide a diagram showcasing dependencies among various modules like Admin Login, Post Management, User Management, etc.

3.2 Data Flow Diagram (DFD) / UML

- Create DFDs or UML diagrams to illustrate how data moves within the system, focusing on user roles and data access patterns.
-

4. User Interface

4.1 Admin Side

4.1.1 Admin Login

- Description of a simple login system that validates admin credentials.

4.1.2 Admin Panel

- **Index Page:** Overview with logout options and role-based access to modules like posts, users, and categories.
- **Post Management:** Pages for adding, updating, and listing posts.
- **Category Management:** Interface for managing categories.
- **User Management:** Page for viewing and managing users.
- **Settings:** Page to update website settings like name and logo.

4.2 Client Side

4.2.1 Home Page

- Features a search bar, category section, recent posts, and blog listings.

4.2.2 Category Page

- Displays posts based on selected categories.

4.2.3 Author Page

- Shows posts by selected authors.

4.2.4 Content Page

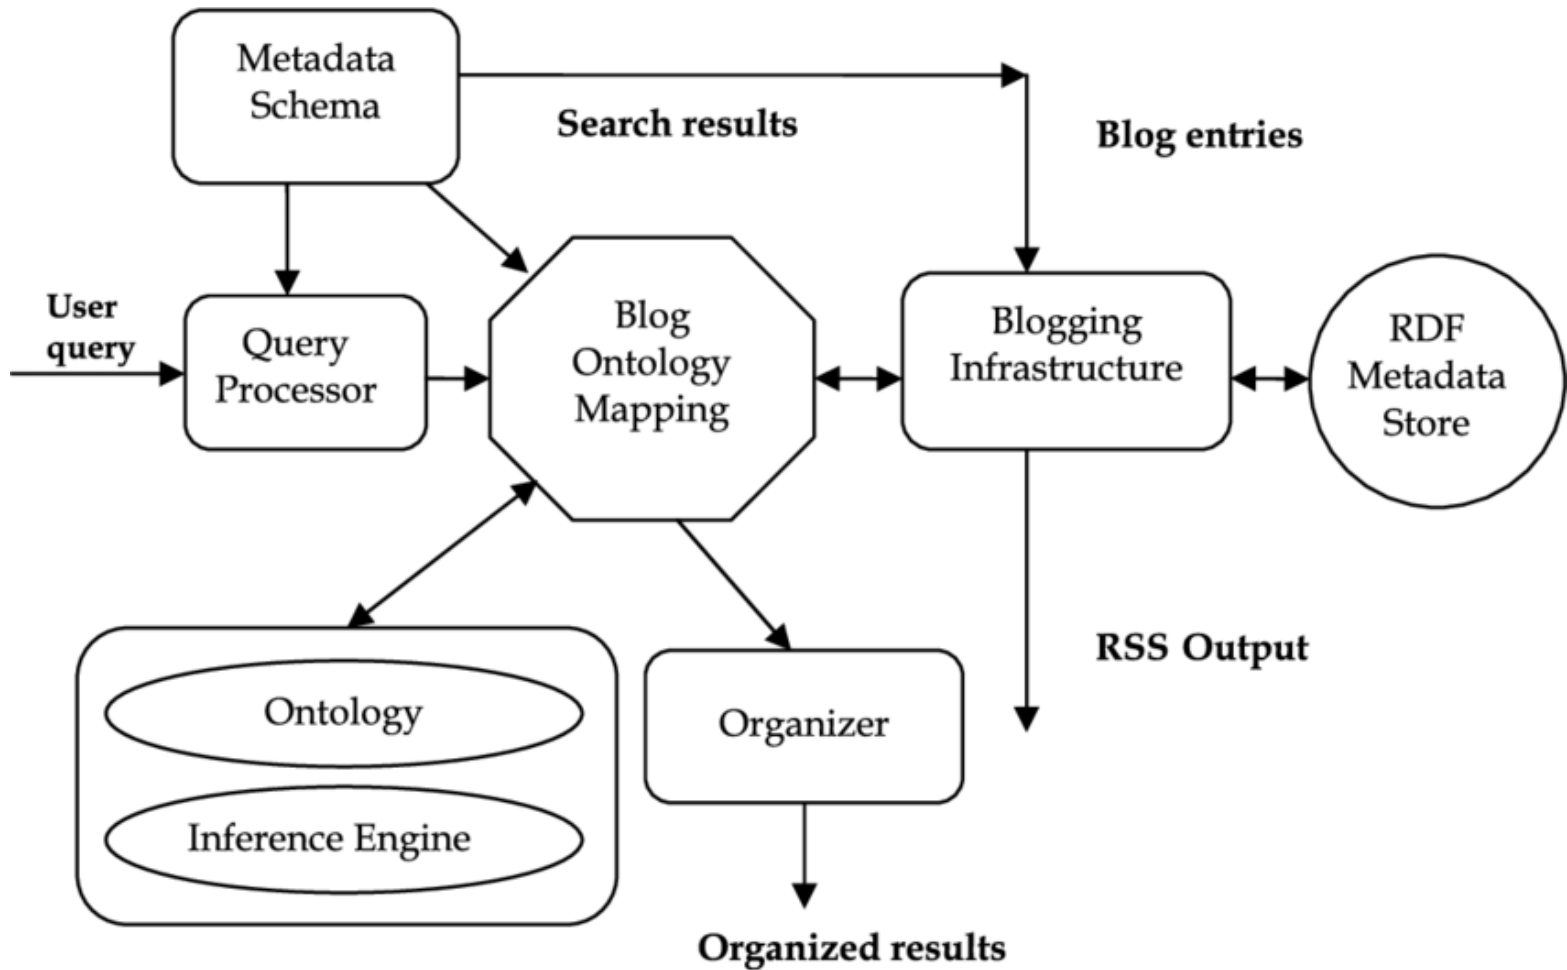

- Detailed view of individual blog posts.

4.2.5 Search Page

- Search functionality that returns relevant posts based on keywords

CHAPTER 3 System Design

○ 3.1 Task Dependency Diagram:-

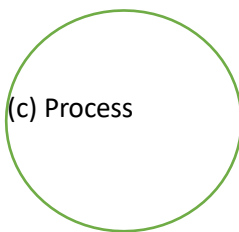

○ 3.2 Data Flow Diagram DFD/UML:-

A Data Flow Diagram (DFD) is a diagram that describes the flow of data and the processes that change or transform data throughout a system. The Data Flow Diagram reviews the current physical system, prepares input and output specification, specifies the implementation plan etc. Four basic symbols are used to construct data flow diagrams. They are symbols that represent data source, data flows, and data transformations and data storage. The points at which data are transformed are represented by enclosed figures, usually circles, which are called nodes.

(A) Source of Destination of data

Data

(B) Flow of

(c) Process

(D) Storage

✧ Steps to Construct Data Flow Diagrams

Four steps are commonly used to construct a DFD

- Process should be named and numbered for easy reference. Each name should be representative of the process.
- The direction of flow is from top to bottom and from left to right.

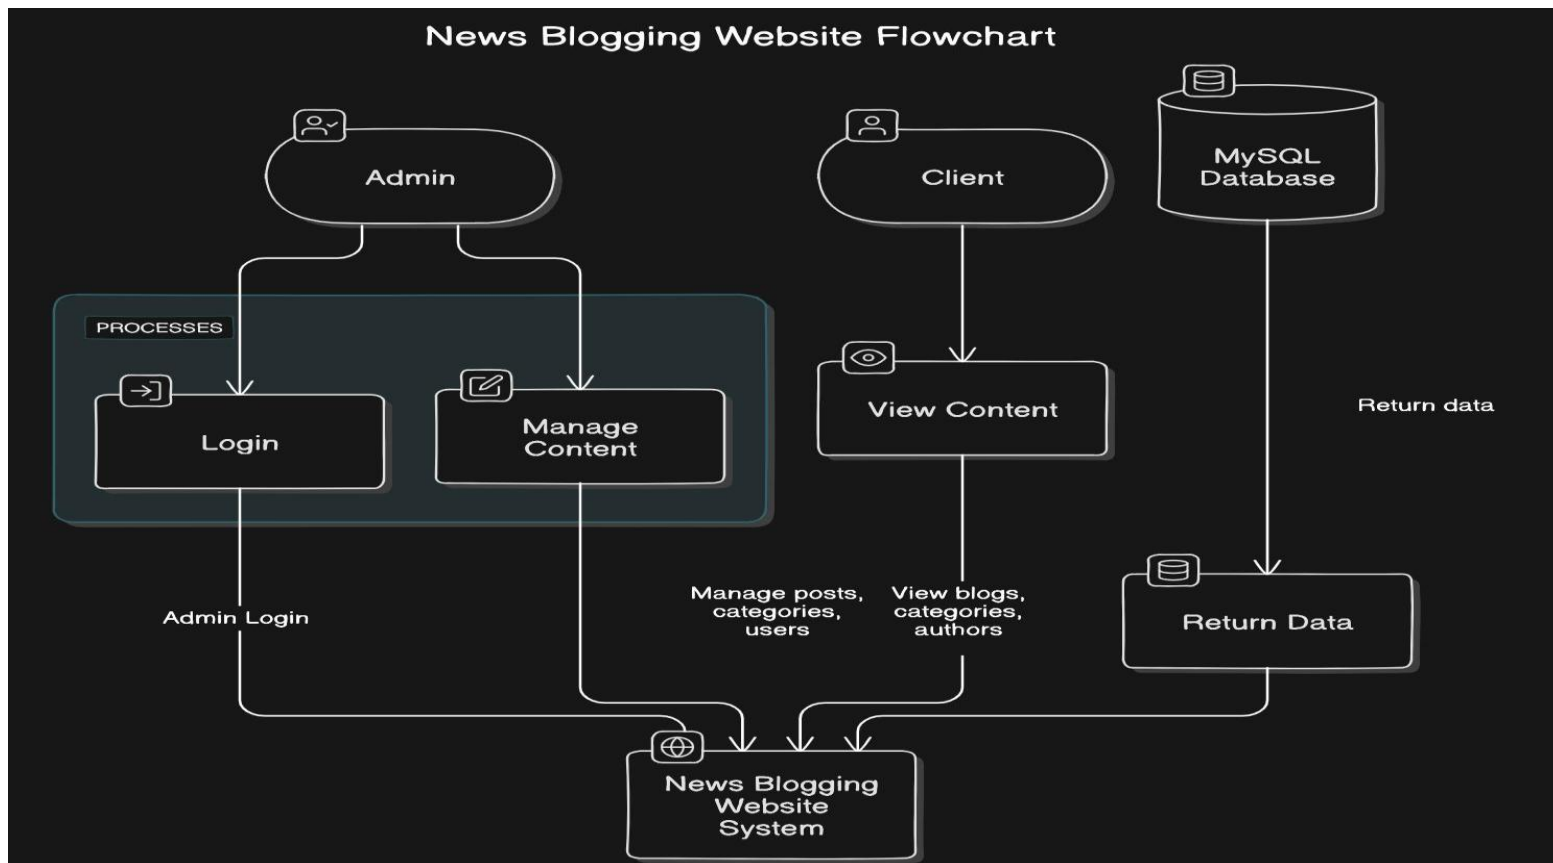

- When a process is exploded into lower level details they are numbered.
- The names of data stores, sources and destinations are written in capital letters

✧ Rules for Constructing a Data Flow Diagram

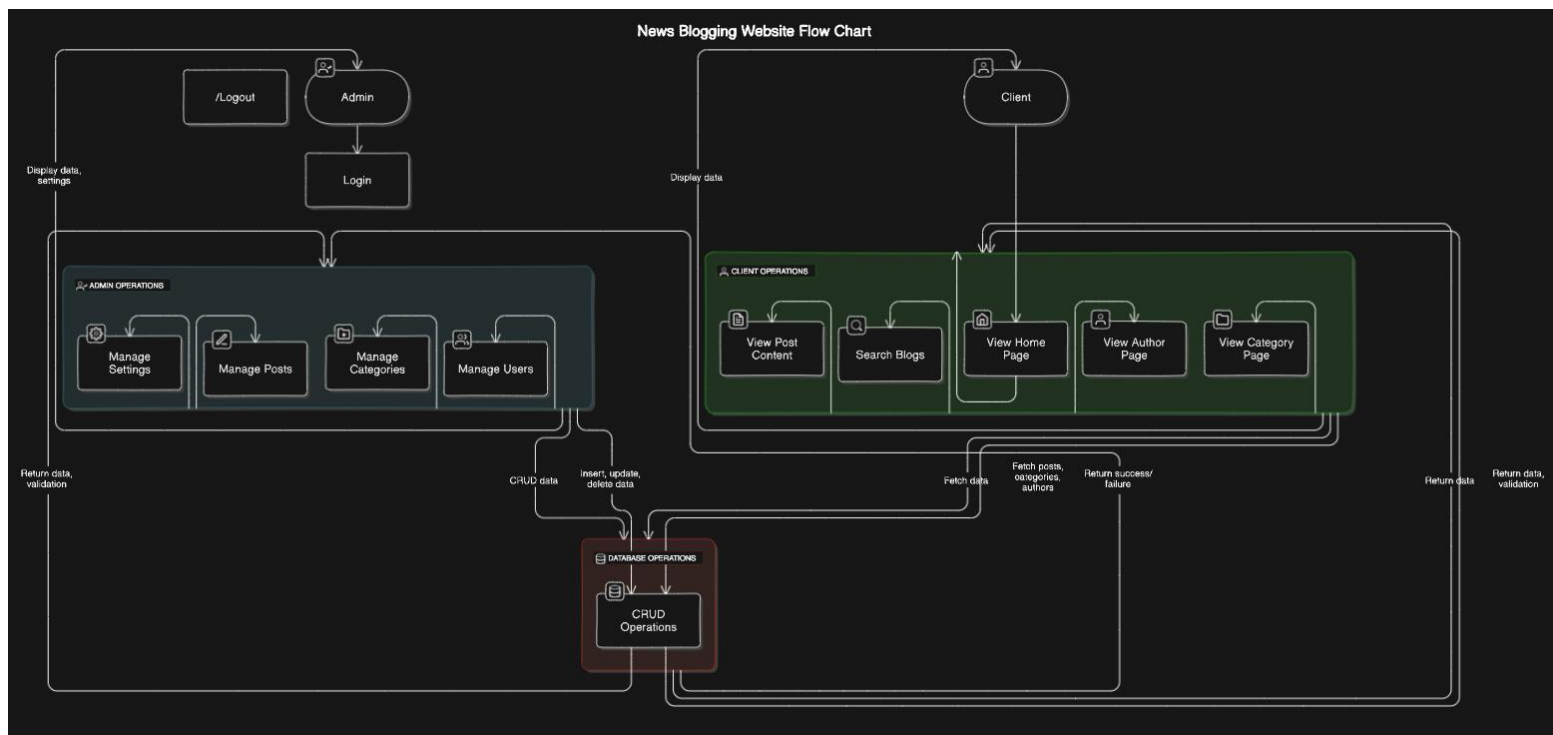

- Arrows should not cross each other.
- Squares, Circles and files must bear names.
- Decomposed data flow squares and circles can have same names.
- Choose meaningful names for dataflow.

Draw all data flows around the outside of the diagram

CONTEXT LEVEL DI AGRAM:

FIRST LEVEL DATA FLOW DIAGRAM FOR ADMIN :-

SECOND LEVEL DATA FLOW DIAGRAM FOR ADMIN:-

3.3 Database Tables

Users Model :-

	#	Name	Type	Collation	Attributes	Null	Default	Comments	Extra	Action
☐	1	user_id	int(10)		UNSIGNED	No	None		AUTO_INCREMENT	Change Drop More
☐	2	first_name	varchar(30)	latin1_swedish_ci		No	None			Change Drop More

☐	6	author	int(11)			No	None			Change Drop More
☐	7	post_img	varchar(100)	latin1_swedish_ci		No	None			Change Drop More

Setting Model:

	#	Name	Type	Collation	Attributes	Null	Default	Comments	Extra	Action
☐	1	id	int(11)			No	None		AUTO_INCREMENT	Change Drop More
☐	2	websitename	varchar(255)	utf8mb4_general_ci		No	None			Change Drop More
☐	3	logo	varchar(255)	utf8mb4_general_ci		No	None			Change Drop More
☐	4	footerdesc	varchar(255)	utf8mb4_general_ci		No	None			Change Drop More

CHAPTER 4

User Interface

○ Admin Side:

▮ 4.1.1 Admin Login:

The image shows a web form for admin login. At the top, the text "PRIME NEWS" is displayed in a large, bold, serif font. Below this, the word "Admin" is written in a smaller, sans-serif font. The form contains two input fields: "Username" and "Password", both with rounded rectangular borders. Below the "Password" field is a black button with the word "Login" in white text.

VI. Conclusion

In conclusion, the News Blogging Website project successfully establishes an interactive and user-friendly platform for creating, sharing, and engaging with news content. Through its structured components—including user registration, content creation, moderation, publishing, and analytics—the website not only facilitates smooth content management but also fosters community interaction and engagement.

By incorporating analytics, the platform provides valuable insights into user behavior and content performance, allowing for data-driven improvements to enhance user experience. Overall, this project demonstrates a comprehensive approach to modern news blogging, balancing the needs of content creators, readers, and administrators. It sets a solid foundation for future enhancements and scalability, positioning the website as a dynamic and reliable source of information in the digital news landscape.
