NEWS BLOGGING WEBSITE INTRODUCTION

The **News Blogging Website** is a user-friendly platform built with **HTML**, **CSS**, **Bootstrap**, and **PHP**. **HTML** structures the content. **CSS** styles the layout for a visually appealing design. **Bootstrap** ensures responsive design with pre-built components. **PHP** handles dynamic content, user authentication, and database interactions.

SCOPE OF THE NEWS BLOGGING WEBSITE:

Client Side Functionalities:

User Registration & Login: Secure account creation and access.

Content Browsing & Search: Intuitive navigation and keyword search.

Category & Author Pages: Explore content by category and author.

Recent & Popular Content: View latest and trending articles

Admin Side Functionalities:

User Management: Add, update, and delete user accounts.

Content Management: Create, edit, and categorize news articles.

Category & Author Management: Manage content categories and author profiles.

System Settings: Customize website features and appearance.

SCOPE OF PROPOSED SYSTEM

User Management

Functionalities for creating, updating, and managing user accounts, including role-based access control for admins and clients.

Content Posting

Ability for users to create, edit, and publish content such as articles, blog posts, and other media, with administrative oversight and approval workflows.

Category Management

Tools for organizing and managing content categories, allowing users to browse and filter content based on specific topics or themes.

Admin Dashboard

A comprehensive dashboard for administrators to monitor user activities, manage content, and configure system settings.

Client Portal

A user-friendly interface for clients to access and interact with the content, including features like commenting, sharing, and personalized recommendations.

OBJECTIVE OF PROPOSED SYSTEM

Enhance User Accessibility

Provide a user-friendly interface and intuitive navigation to ensure all users can easily access and interact with the platform.

Streamline Content Management

Implement a robust content management system that enables efficient creation, editing, and publishing of content.

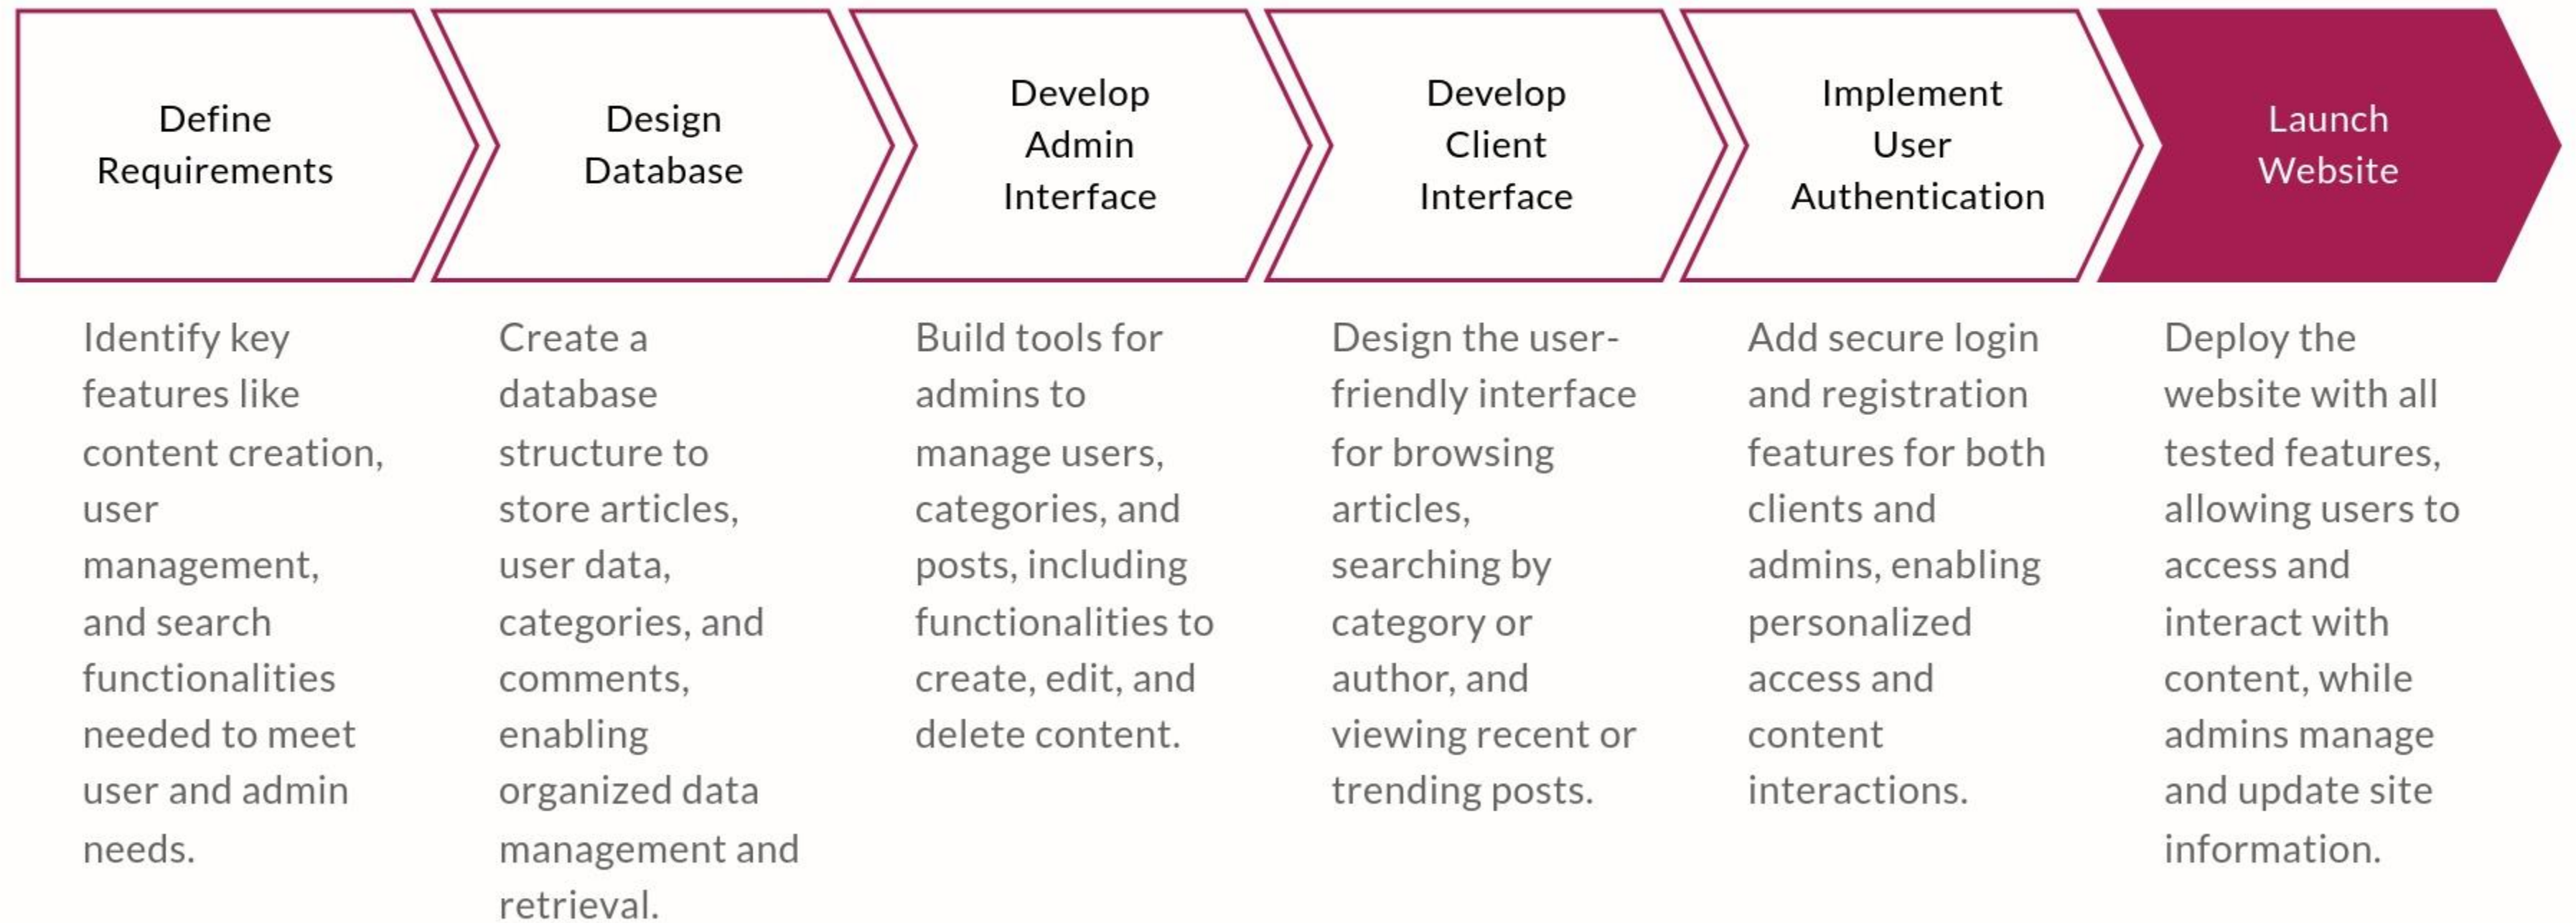

Ensure Secure and Reliable Platform

Implement robust security measures and redundancy to provide a secure and reliable platform that protects user data and ensures system uptime.

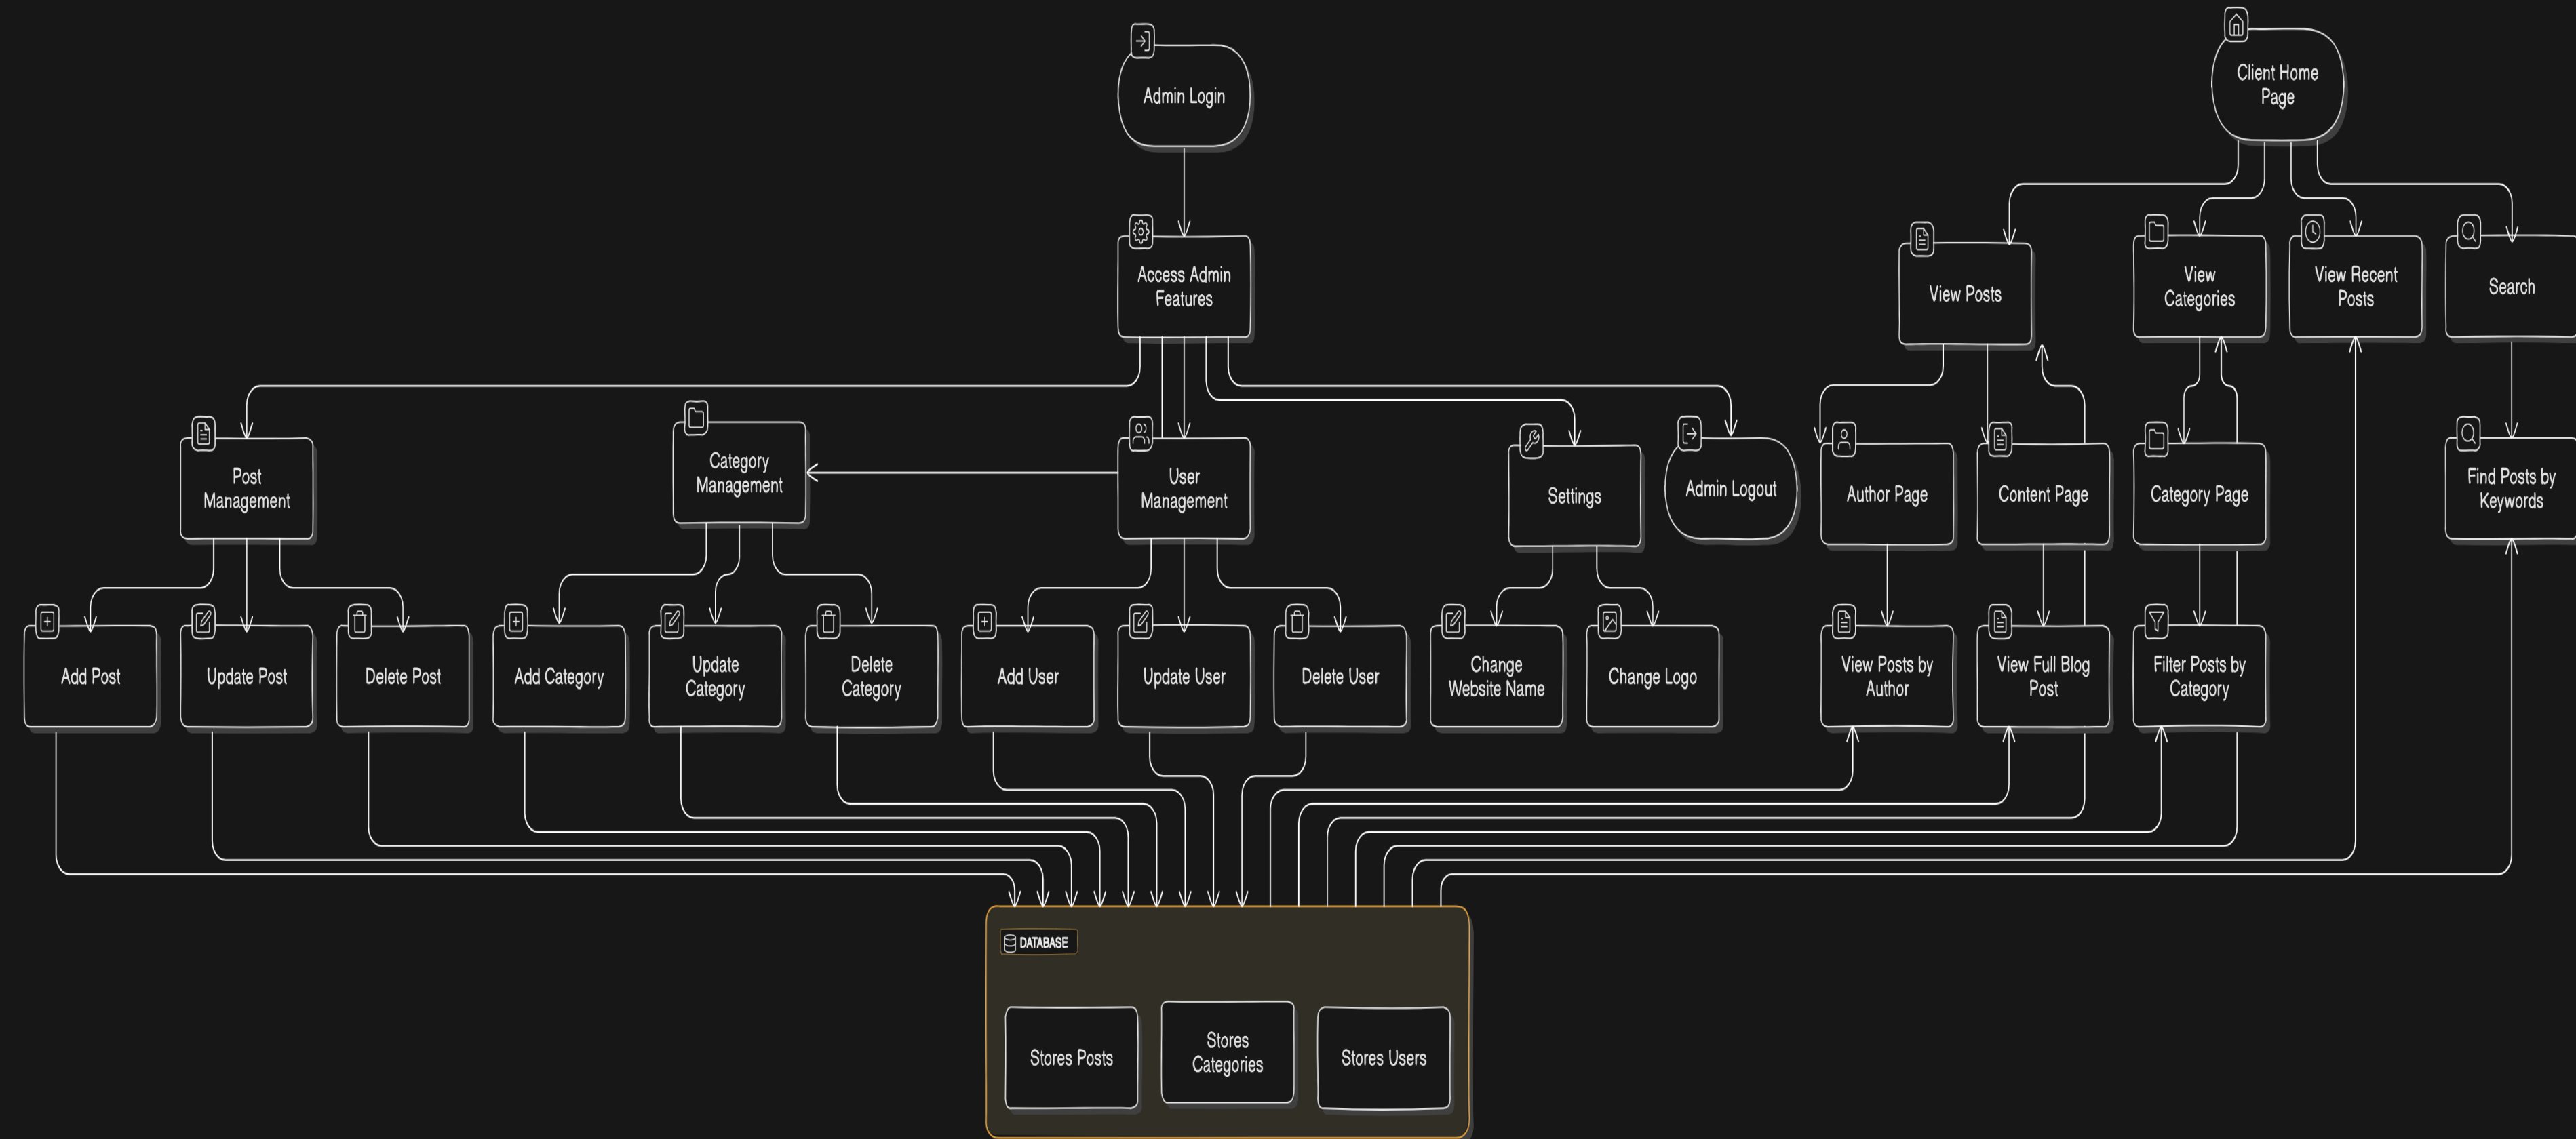

By focusing on these key objectives, the proposed system aims to deliver a seamless and secure user experience while empowering content creators to manage their content effectively.

USER INTERFACE: ADMIN SIDE

Manage Posts

The admin can create, edit, and delete blog posts within the platform.

Manage Users

The admin can view, add, and remove user accounts, as well as manage their permissions and roles.

Manage Categories

The admin can create, edit, and delete the categories used to organize blog content.

Manage Settings

The admin can configure various system settings, such as site branding, SEO options, and email notifications.

Analytics Dashboard

The admin can view detailed analytics and reporting on user activity, content performance, and other key metrics.

ADMIN PAGE

The **Admin Page** features a dynamic menu bar with options for managing users, categories, posts, and settings. Each section includes add, delete, and edit functions that display interactively in tables. All elements, such as the website title, logo, and footer, are dynamically customizable. The page adapts based on user roles, showing or hiding menu options according to assigned permissions, ensuring a tailored and secure interface for each role

POST PAGE

The **Post Page** on the admin side allows for comprehensive **post management** with options to **add, edit, and delete** news articles. It displays all posts in a **dynamic table**, where admins can view details like the **title, category, author, and publication date**. Each entry is interactable, providing quick access to modify content, update categories, or adjust visibility settings. This page streamlines the content management process, ensuring that updates are easily made and instantly reflected on the website.

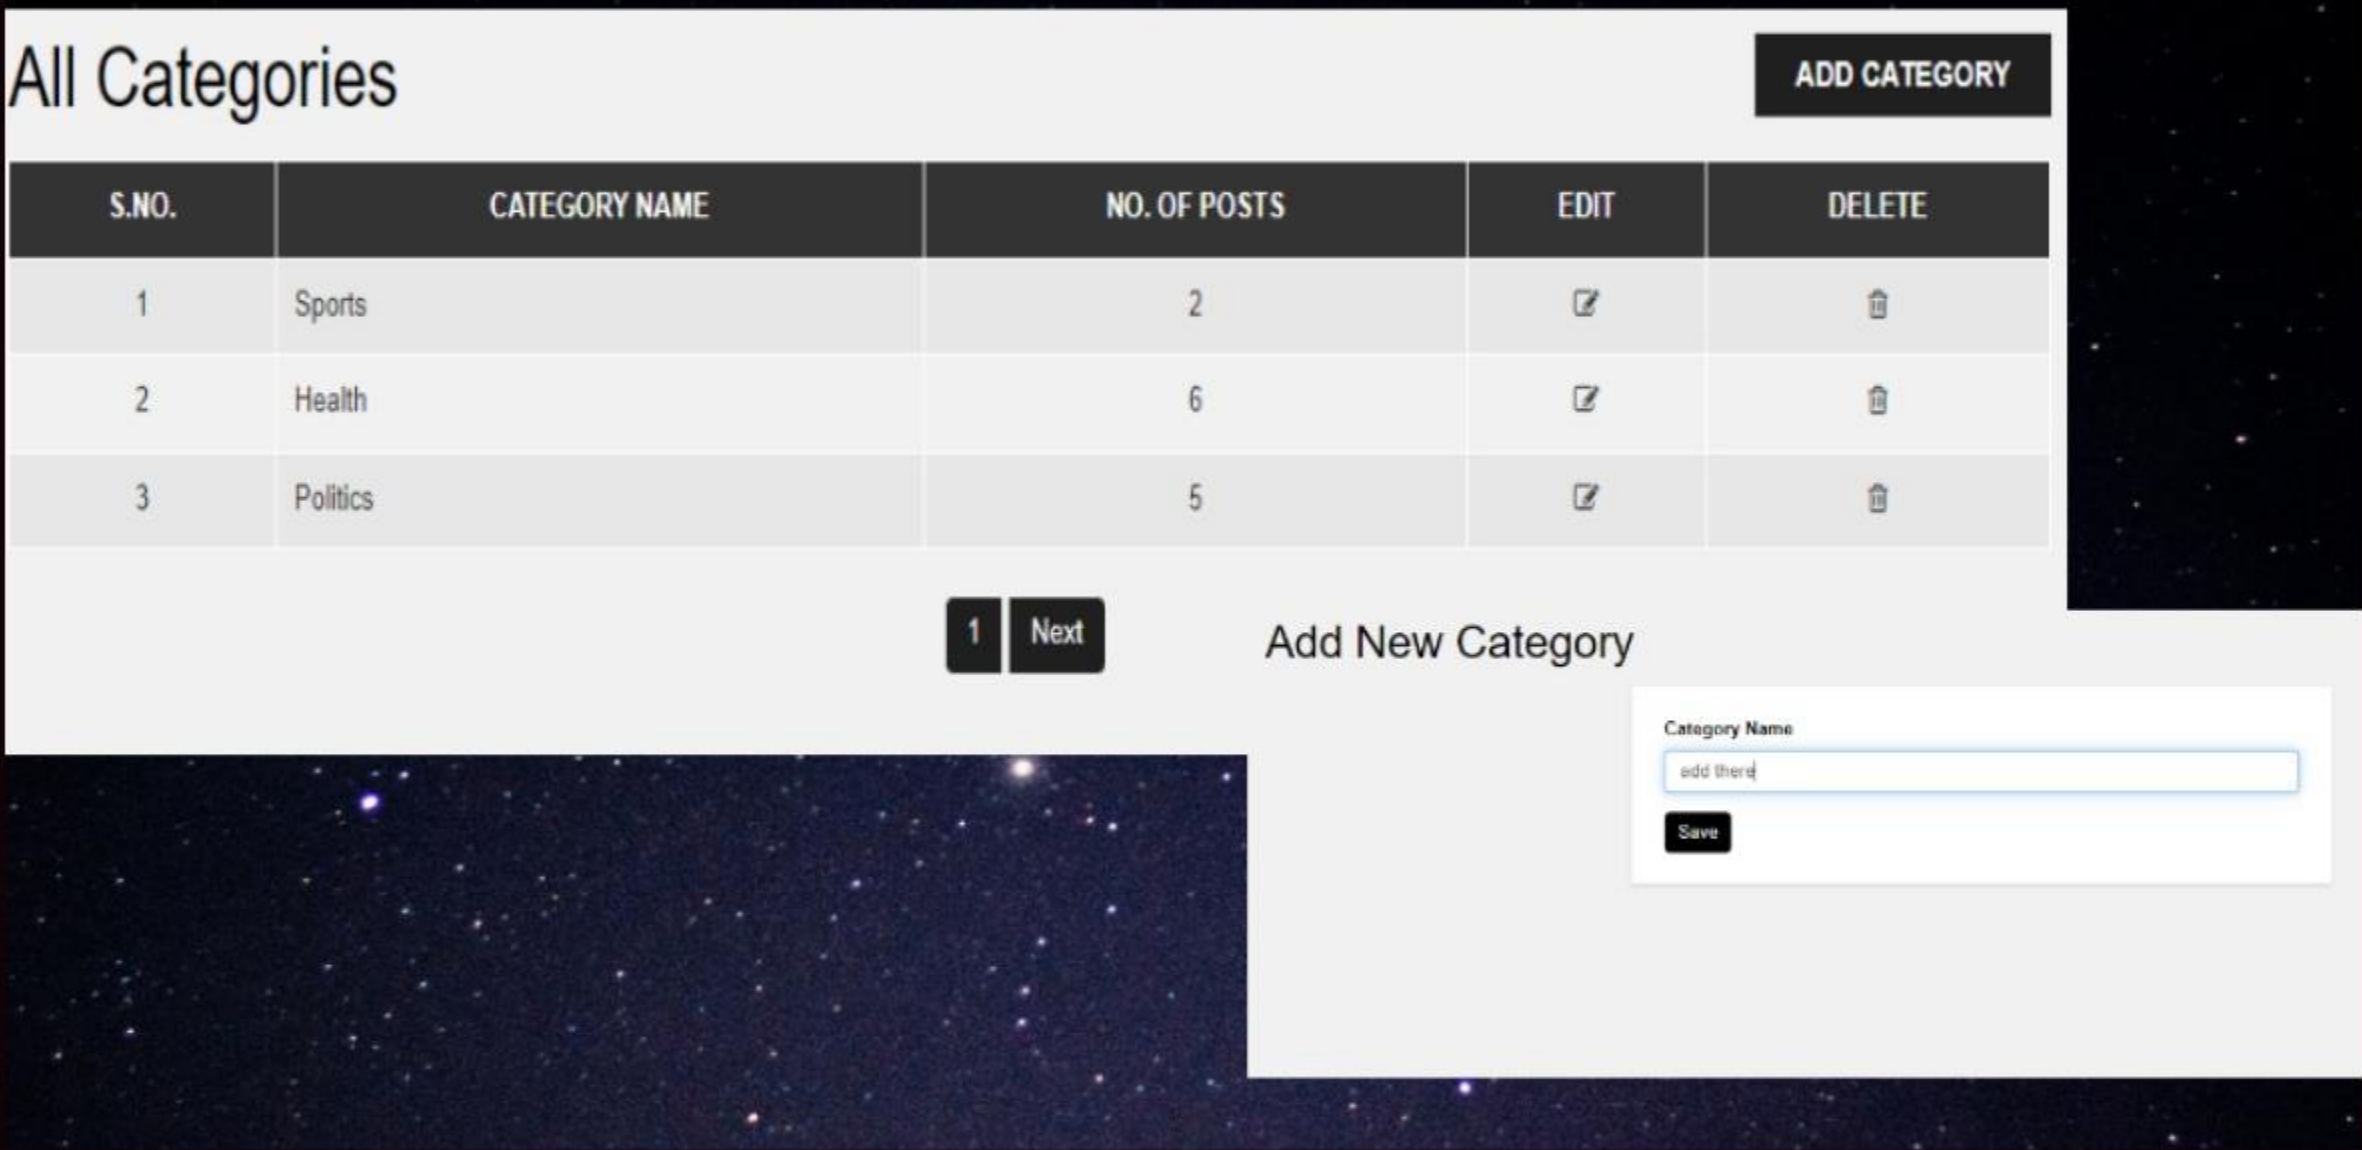

CATEGORY PAGE

The Category Page provides an interactive interface for managing content categories. Admins can add new categories, delete existing ones, and edit category details, all reflected in a dynamic table format. The page displays current categories with options for sorting and filtering to enhance usability.

Admin roles determine which features are accessible, ensuring that users see only relevant actions based on their permissions.

This approach streamlines category management and maintains an organized structure for the content.

USER PAGE

The Users Page offers a dynamic interface for managing user accounts. Admins can add new users, edit existing user details, and delete accounts, all presented in an interactive table format. The page displays essential user information, such as usernames, roles, and account status, with sorting and filtering options for easy navigation. Role-based access controls ensure that admins see only the functions relevant to their permissions, allowing for secure and efficient user management while maintaining an organized overview of all accounts.

SETTING PAGE

The **Settings Page** provides a user-friendly interface for customizing the website's appearance and functionality. Admins can update key elements such as the website title, logo, and footer, with changes reflected dynamically across the site.

The page includes options for adjusting other site settings, such as theme preferences and user permissions. Role-based access controls ensure that only authorized users can modify critical settings, maintaining security and consistency. This streamlined design enables admins to efficiently manage site configurations and enhance the overall user experience.

USER INTERFACE: CLIENT SIDE

Content Browsing

The client interface allows users to browse through a wide range of content, including articles, videos, and multimedia, providing a seamless and intuitive browsing experience.

Registration

Users can easily register and create an account through the client interface, enabling them to access personalized features and content.

Personalized Content

The client interface leverages user data to deliver personalized content recommendations, ensuring a tailored and engaging user experience.

Interactive Features

The client interface incorporates interactive features such as search, filtering, and sorting options, allowing users to efficiently navigate and discover relevant content.

CLIENT SIDE:HOME PAGE

The **Home Page** on the client side features a well-organized layout for browsing blog posts categorized for easy access. Each post displays essential information, including the creation date, author name, and associated category, ensuring users can quickly identify relevant content.

Category-Wise Blog Posts: Posts are grouped by categories, allowing users to filter content easily.

Post Details: Each entry includes the date, author, and category, providing context at a glance.

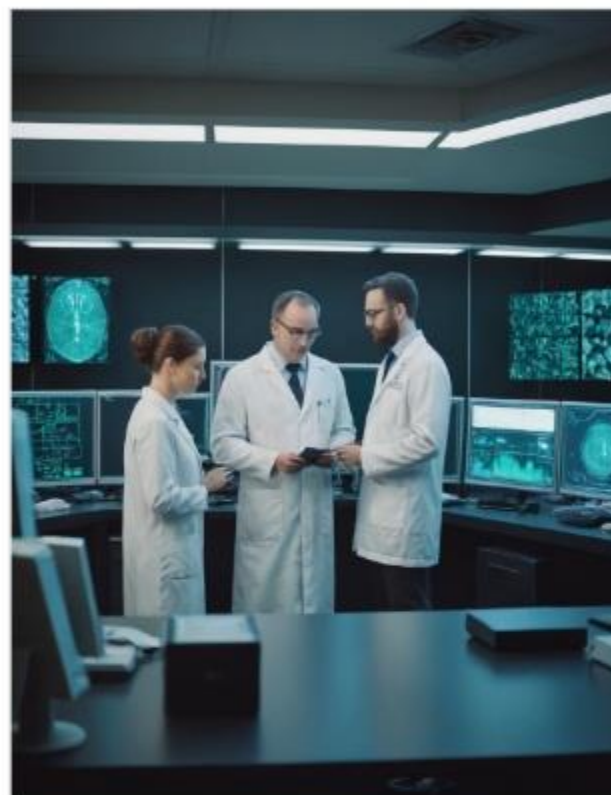

Special Pages: Users can click on individual posts to open dedicated pages for detailed viewing.

Recent Posts Container: A section highlights the latest posts, ensuring users stay updated with new content.

Search Box: An integrated search feature enables users to find specific posts quickly by keywords.

The High Cost of Failure in Medical Research: Understanding the Financial Impact

Health | Janmanholtra | 5 Feb, 2024

Introduction Medical research is a complex and costly endeavor, with many projects failing to reach fruition. This blog will explore the financial implications of failure in medical research, the reasons behind these failures, and the impact on the healthcare industry. **What Happens in the Image** The image shows three individuals in a laboratory setting, wearing white lab coats and standing in front of computer

CLIENT SIDE: CATEGORY PAGE

Category Overview: Displays a list of categories, allowing users to select and explore specific topics of interest.

Blog Posts List: Each category showcases relevant blog posts, including essential details such as the post title, creation date, author name, and a brief excerpt.

Post Details: Users can click on a post title to access the full content on a dedicated page, fostering deeper engagement.

Sorting and Filtering Options: Users can sort posts by date or popularity and filter content within the category for a more tailored browsing experience.

Search Functionality: A search box allows users to quickly find specific posts within the selected category.

Responsive Design: The layout adapts seamlessly across devices, ensuring a user-friendly experience on desktops, tablets, and smartphones. This design effectively organizes content by category, making it easy for users to find and engage with relevant blog posts.

The High Cost of Failure in Medical Research:

CLIENT SIDE: SEARCH PAGE

Search Bar: A prominently placed search box allows users to input keywords or phrases to find specific blog posts quickly.

Search Results Display: The results are presented in a clear, organized list format, showcasing relevant posts along with essential details such as the title, creation date, author, and a brief excerpt.

No Results Message: If no posts match the search criteria, a friendly message informs users, encouraging them to try different keywords.

Quick Access Links: Each result includes clickable links that take users directly to the respective post pages for further reading.

Intuitive Navigation: The page includes breadcrumbs or links back to the home page and category pages, ensuring easy navigation throughout the site.
